## 2.5 Input Modalities: Make it easier for users to operate functionality through various inputs beyond keyboard.

### Success Criteria 2.5.1 Pointer Gestures (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-gestures.html> for more information about this guideline.

 All functionality that uses multipoint or path-based gestures for operation may not be operable with a single pointer without a path-based gesture unless a multipoint or path-based gesture is essential.

## 2.5 Input Modalities: Make it easier for users to operate functionality through various inputs beyond keyboard.

### Success Criteria 2.5.1 Pointer Gestures (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-gestures.html> for more information about this guideline.

 All functionality that uses multipoint or path-based gestures for operation may not be operable with a single pointer without a path-based gesture unless a multipoint or path-based gesture is essential.

```

### Success Criteria 2.5.2 Pointer Cancellation (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-cancellation.html> for more information about this guideline.

 Functionality that can be operated using a single pointer may not allow cancellation.

## 2.5 Input Modalities: Make it easier for users to operate functionality through various inputs beyond keyboard.

### Success Criteria 2.5.1 Pointer Gestures (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-gestures.html> for more information about this guideline.

 All functionality that uses multipoint or path-based gestures for operation may not be operable with a single pointer without a path-based gesture unless a multipoint or path-based gesture is essential.

### Success Criteria 2.5.2 Pointer Cancellation (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-cancellation.html> for more information about this guideline.

 Functionality that can be operated using a single pointer may not allow cancellation.

## 2.5 Input Modalities: Make it easier for users to operate functionality through various inputs beyond keyboard.

### Success Criteria 2.5.1 Pointer Gestures (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-gestures.html> for more information about this guideline.

 All functionality that uses multipoint or path-based gestures for operation may not be operable with a single pointer without a path-based gesture unless a multipoint or path-based gesture is essential.

### Success Criteria 2.5.2 Pointer Cancellation (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-cancellation.html> for more information about this guideline.

 Functionality that can be operated using a single pointer may not allow cancellation.

## 2.5 Input Modalities: Make it easier for users to operate functionality through various inputs beyond keyboard.

### Success Criteria 2.5.1 Pointer Gestures (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-gestures.html> for more information about this guideline.

 All functionality that uses multipoint or path-based gestures for operation may not be operable with a single pointer without a path-based gesture unless a multipoint or path-based gesture is essential.

```

### Success Criteria 2.5.2 Pointer Cancellation (A)

#### THIS CRITERIA REQUIRES MANUAL TESTING

You will need to test this criteria manually and archive if it is not a failure of this guideline.

See <https://www.w3.org/WAI/WCAG21/Understanding/pointer-cancellation.html> for more information about this guideline.

 Functionality that can be operated using a single pointer may not allow cancellation.
